Modelled Lesson Observation - Features of Rich Learning in Mathematics

Feature	Observations
Provide some success for all students.	
Provide challenges for all students.	
Take into consideration different learning styles.	
Allow the use of multiple strategies to solve problems.	
Activities are easily connected to the lives of the children.	
Opportunities for peer teaching.	
Opportunities to find out rather than be told.	
Have the appropriate materials for the task at hand.	
Are time efficient and manageable.	
Provide some time to reflect on what is being learnt.	
Provide different entry and exit points for students who are working at different levels.	
Lessons are planned and built on prior learning.
